## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6397752 issued to Yang in view of US 5431104 issued to Barker. Yang discloses an apparatus for explosively severing a length of pipe. The apparatus comprising, an explosive adapter 20 including detonating socket housings 150; tubular housings 18A, 18B connected by adapter 20; and, a spring. One or more of the adapters 20 may be used in series, therefore, opposite ends of either housing 18A or 18B will have the same configuration. Yang does not appear to disclose the use of a capacitive firing cartridge within the housing. Barker teaches the use of an EBW for initiating equipment placed in a well borehole, the EBW including a capacitor 23. At the time of the invention, one having ordinary skill in the art would have found it obvious to provide the explosive apparatus of Yang with the EBW of Barker. The suggestion/motivation for doing so would have been to provide an detonator having a lower actuation voltage requirement and to maintain safety.

### ***Response to Arguments***

3. Applicant's arguments filed 08/21/2007 have been fully considered but they are not persuasive. Applicant argues that certain limitations that are allegedly in the claims

are not found in the prior art. However, the examiner has found that applicant's limitations are not positively recited subject matter of the claims and, therefore, are not required to be found in prior art. For example, paragraph (a) of claim 21 merely requires a tubular housing having an internal barrel space. It is irrelevant what the space is *to be* used for. A tubular housing for housing cupcakes is not different than a tubular housing for receiving an axial column of explosive material. In the preamble, the phrase "for explosively severing a length of pipe" is non-limiting. Its intended use is irrelevant. In paragraphs (b) and (c), the phrases "electrically initiated" are not structural limitations. In the same paragraphs, the phrase "disposed to bear upon" does not require anything to bear upon anything else.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
